ONE TEAM – ONE OUTFIT

Every team is unique – that is why it needs a common outfit. This counts in sports as well as at work. That's why we offer the optimal equipment for every team. Whether at the bakery, in the doctor's office or in the industrial company: WE ARE TEAM.

PHARMACY

FIRE BRIGADE

WILDLIFE RESCUE

SERVICE

We are experts in equipping teams and have always focused on our customers. Individual support and comprehensive, personal service are important to us. In addition, we have developed digital solutions to be the perfect partner for everything to do with team equipment.

WE ARE PERSONAL

For us, personal contacts and long-term relationships are the most important components of trusting and cooperative work. Our broad network of specialist dealers guarantees personal support, qualified advice, and extensive on-site service.

WE ARE DIGITAL

We offer digital solutions for a fast and efficient processing of orders and support you in setting up your own online shop for your team. Simple ordering processes for all team members and individual configurations of the desired items set new standards for team orders.

WE ARE RELIABLE AND FAST

We know how important fast delivery is. That is why we have set ourselves the goal of shipping all orders within 24 hours of receiving the order. With our fully automated AutoStore® warehouse system, we can process the orders we receive every day even faster and more reliably

WE ARE FLEXIBLE AND INDIVIDUAL

We always have a solution. From graphic marketing support to a tailor-made marketing concept for specific projects. We are happy to support. In terms of logistics, we also meet individual requirements and offer additional services. A specific item labeling, shipping in the desired box or our repair service. We are flexible and offer the right concept depending on your needs.

TEAMWEAR

PROCESSING

We pay attention to first-class workmanship and stand for durability and a high quality standard. This, for example, we provide through reinforced shoulder seams, double seams in hem and cuffs or through high quality accessories.

AVAILABILITY

We stand for availability. 95 % of our articles are stored in the JAKO logistics center at all times. The 15.000 pallet storage spaces and one of the largest high-bay warehouses in Europe enable an optimal supply of goods and ensure the availability of our products.

SUSTAINABILITY

We are fair and take responsibility. That is why we have committed ourselves to steadily increasing the proportion of sustainable materials in our products. In the teamline ORGANIC, we have only processed organic cotton and thus created a sustainable teamwear.

COLOURS

We have the right colour for every team. A large selection of colours and an optimal colour concept ensure a uniform appearance. The high quality of the dyes we use guarantees intense colours and colour fastness. Even after numerous washes.

QUALITY

We place high demands on our products and suppliers. The specifications of dimensional stability, colour management, material properties and product safety must be met with every delivery. We check this on site at the supplier and when the goods arrive at our warehouse.

RUNNING TIMES

We offer planning security. Long running times for our articles and collections enable long-term availability of the uniform team equipment. This saves time and money, because the new team members can also obtain the existing team collection quickly and easily.

SIZES

Our articles are available from S - 5XL and mostly for women from 34 - 48. The most important articles are also available for children in 116 - 164. A classic cut for men, a tailored ladies cut or also in oversizes. We have the right articles for all team members.

MATERIALS

We only use the highest quality materials and accessories. For example combed, ring-spun organic cotton or high performance polyester. We process quality. Also, accessories like buttons and zips we obtain exclusively from long-term partners.

INDIVIDUALISATION

If the right article is not there, we produce special models exactly as requested. Whether your own colour or your own design. Our product development implements the individual ideas. Our specialist dealers accompany the process from creation to delivery.

JAKO TEAMWEAR

QUALITY AND SAFETY

We place high demands on our teamwear and our partners. We concentrate on selected main suppliers with whom we work long-term. In addition, we have defined our own standards for physical textile tests such as washing behavior, tear resistance or colour fastness. These are checked by independent test laboratories during development and production.

COLOURS

Our articles are intensively tested for their colour fastness. These tests ensure that our teamwear retains its colour even under heavy use and under numerous external influences such as friction, moisture, light or heat.

FIT

Our teamwear fits and holds its shape. We check our articles several times for optical properties such as dimensional stability and seam behavior. In this way we guarantee an optimal fit as well as stable seam processing and dimensional stability

MATERIAL

We stand for high quality teamwear. Our textiles are tested for physical properties such as tear resistance, elasticity or abrasion resistance. This is how we guarantee a high level of resistance and a long service life.

TEAMLINE DOUBLETEX

TESTED WORKWEAR

Our teamline DOUBLETEX is specially designed for top performance in business and leisure. The Hohenstein quality label „**Tested Workwear**“ distinguishes textiles with particularly high demands on product safety and quality. This label confirms that our teamline DOUBLETEX articles meet these high requirements.

Hohenstein tests our teamline DOUBLETEX for the following properties:

- Colour fastness such as light, perspiration, rub and wash fastness
- Colour fastness with strong heat development
- Physical properties such as seam and tear strength, elasticity and pilling
- Optical properties such as dimensional stability, twisting of the seams and the appearance after numerous intensive washes

TEAMLINE **ORGANIC**

Cotton from controlled organic cultivation in the complete teamline ORGANIC

All articles are pre-shrunk and washable at 60 °C. Shape-retaining and colourfast even after several washes

Very long durability due to reinforced seams and combed, ring-spun cotton fibres

High-quality accessories such as buttons, zips and zip pullers with JAKO logo

Elastic ribbed cuffs for a perfect fit and a pleasant wearing comfort

TEAMLINE DOUBLETEX

Exclusively developed and highly functional JAKO material mix of cotton and polyester

innovative VORTEX® yarn technology and reinforced seams for high resistance and shape-retention

High-quality accessories such as buttons, zips and zip pullers with JAKO logo

all DOUBLETEX articles are certified with the quality label „Tested Workwear“ by the Hohenstein Institute

All articles suitable for professional textile washing according to DIN EN ISO 15797

JAKO FAIR

With the JAKO Fair label, we mark articles made from more sustainable materials.

100 % of the materials used are made from recycled raw materials or organic cotton.

At least 50 % of the materials used are made from recycled raw materials or organic cotton.

During regular visits, the CEO, Nadine Sprügel, personally convinces herself of the quality of production.

With the JAKO recycling truck, we have already taken the first steps towards a complete recycling economy.

OUR TEAM FOR A BETTER WORLD

Sustainability for us is the responsible use of resources and long-term oriented corporate management. Above all also the fair treatment of people. On the one hand with our suppliers and their employees. But especially with us in the JAKO Teamcenter as well as with our retailers and clubs. On our "Our team for a better world" website we would like to tell you more about our goals and projects on the topic of sustainability. Tell us about your ideas there too! We want to learn from you and network with you. Together we can make the world more sustainable every day. Our team for a better world!

OUR
TEAM
FOR A
BETTER
WORLD

SUSTAINABILITY

IS TEAMWORK

SUPPLY CHAINS

It is important for us to know where, by whom and how our articles are produced. Therefore, suppliers are carefully selected and regularly visited. We concentrate on a few main suppliers with whom we have a long-term and very cooperative relationship. This increases transparency and enables consistently high quality and fast delivery times for our customers. In many personal discussions, we work out concepts and solutions with our long-term partners on the responsible social and ecological issues in order to manufacture our products in a fairer and more ecologically sustainable way.

RECYCLING MANAGEMENT

In summer 2022, we collected discarded sportswear together with our partner clubs in Germany and Switzerland. In the future, we would like to return these to the cycle in a meaningful way and give them a second life. In the next step, together with our cooperation partner, we will produce new yarn from the discarded garments, which in turn can be used for new JAKO articles.

Do you want to learn more about sustainability or tell us about your contribution? Then scan the QR code!

JAKO TEAMSHOPS

THE ONLINE SHOP FOR YOUR TEAM!

Your own webshop with the individual collection for all teams at work and during leisure time? This is now possible with the JAKO Teamshops - more than 8.000 teams have already joined! Every team can easily present its JAKO collection in an individual web shop and buy it there directly. Design the teamshop according to your demands, choose your articles and add the individual customization. Connect the teamshop directly with your local retailer – this is how pros order! Scan the QR code now for more information.

- ✓ Quick and simple
- ✓ Order online easily
- ✓ Individually for your team

CUSTOMIZATION

Uniform customization creates a sense of community. The logo makes a team outfit complete, individual and impressively carries the identity outwards. There is a suitable customization method for every requirement and article. For the optimal display of the motifs and the perfect appearance.

DIRECT-TO-GARMENT

The ink is printed directly onto the textile by a print head. The printing process is digital, so multi-coloured motifs and colour gradients are also possible.

SCREEN PRINTING

The motifs are printed directly onto the textile through a screen. A separate screen is created for each colour. Colour gradients can only be indicated, but multi-coloured logos are possible.

FLOCK TRANSFER/FLEX TRANSFER

The motifs are punched out of special flock or flex foil and pressed onto the textile with heat. The transfer enables the representation of monochrome motifs.

DIGITAL TRANSFER

The motifs are printed directly on flex foil using a printer, then punched out and pressed onto the textile with heat. Multi-coloured and photo-realistic motifs and colour gradients are possible.

EMBROIDERY

The motifs are embroidered onto the textiles using a multi-head embroidery machine. Before customization, an embroidery program of the motif is created. Multi-coloured motifs are possible.

TEXTILE CARE

Washing and drying suitable for textiles is an essential part of clothing care. In order to enjoy our textiles for a long time, you should absolutely pay attention to the care symbols on the label in the clothing. For more information visit www.jako.de

COTTON

Cotton is very durable and hard-wearing. Our cotton items can be washed up to 60 °C. Dryers and irons are also no problem for the cotton items.

POLYESTER

Polyester is very dimensionally stable and only creases a little. Our articles made of functional fibers can be washed up to 40 °C. Dryers and irons are usually not necessary.

GENERAL TIPS

All textiles should be washed separately by colour. Zips and buttons must be closed before washing. You should generally avoid using fabric softener. Prints and applications must not be ironed.

IMPORTANT

The information on the care label only applies to the textile. The suitability of the customization to be cared for must be checked separately. In the event of improper textile care, we cannot accept any liability for any damage resulting therefrom.

CLEVER TEXTILE CARE

Clever textile care protects the environment. The care label shows the maximum possible care. However, this is often not necessary. By washing at low temperatures or drying on the line, you can save a lot of energy and improve your carbon footprint. You can find more information at www.clevercare.info

Mike is 184 cm tall
and wears size L

Susanne is 165 cm tall
and wears size 40

Daniel is 188 cm tall

The size charts of our CORPORATE TEAMWEAR serve as a guide and orientation. We recommend sampling the articles at one of our local qualified specialist retail partners.

For the selection of the perfect size, it should be taken into account that the articles of our CORPORATE TEAMWEAR are cut a little wider than our team sport items.

IMPRINT: JAKO AG | Amtstraße 82 | 74673 Mulfingen | Germany | www.jako.de

Printed in Germany. The catalogue prices are the manufacturer's recommended retail price, including statutory VAT. They are valid from 01.01.2023. Please note our current price list. For photographic, reproduction and printing reasons, there may be colour deviations between the images and the original goods. We reserve the right to make technical changes in design, colour, function, and material in order to improve the product. For printing errors, we cannot accept any liability! We reserve the right to adjust the delivery times specified in the catalogues in the future if the associated product line is discontinued and / or the products can no longer be manufactured economically.
